The Agricultural and Biosystems Engineering Conference is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Agricultural and Biosystems Engineering.

Participants are invited to explore the full spectrum of latest trends and innovations in this ever increasingly important field of science. The multidisciplinary focus of this event aims to bring together distinguished presenters and attendees from different fields with expertise in various areas of Agricultural and Biosystems Engineering, providing an excellent opportunity to participate in an international exchange for addressing problems within Agricultural and Biosystems Engineering.

The program includes time allocated for networking, peer-to-peer discussions, and exploring the host city.

We invite the participation of leading academic scientists, researchers and scholars in the domain of interest from around the world to submit original research contributions relating to all aspects of:

- Land and Water Management for Agriculture
- Landscape Protection and Preservation
- Irrigation for Food Security and Quality of Life
- Remote Sensing for Land and Water Management for Agricultural Applications
- Wastewater Reuse in Irrigation
- Advances in Irrigation Agronomy
- Modernization of Irrigation Systems
- Economics of Irrigation
- Information Technologies for Irrigation and Water Management
- Wind Erosion, Water Erosion and Environmental Protection
- Soil Conservation and Improvement
- Irrigation and Soil Monitoring: Practices and Equipment
- Drought Management
- Livestock Science and Production
- Livestock Structures
- Precision Livestock Farming
- Livestock Environment Control
- Livestock Waste Treatment
- Alternative Livestock Production Systems
- Animal Welfare and Assessment in Agriculture
- Aquaculture Science
- Precision Aquaculture Farming
- Aquaculture Facilities and Equipment
- Aquaculture Control and Assessment
- Aquaculture and Fisheries
- Aquaculture Industry
- Climate Change and Aquatic Biodiversity
- Technological Advances in Aquaculture
- Challenges in Aquatic Health Management
- Greenhouse and Agriculture
- Greenhouse Environment and Equipment
- Greenhouse Design and Construction
- Greenhouse Structures and New Materials
- Greenhouse Horticulture
- Agriculture Machinery
- Agricultural Machinery Standardization
