The Biotechnology and Bioengineering Conference is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Biotechnology and Bioengineering. Participants are invited to explore the full spectrum of latest trends and innovations in this ever increasingly important field of science. The multidisciplinary focus of this event aims to bring together distinguished presenters and attendees from different fields with expertise in various areas of Biotechnology and Bioengineering, providing an excellent opportunity to participate in an international exchange for addressing problems within Biotechnology and Bioengineering.

The program includes time allocated for networking, peer-to-peer discussions, and exploring the host city.

We invite the participation of leading academic scientists, researchers and scholars in the domain of interest from around the world to submit original research contributions relating to all aspects of:

- Bioscience, Biotechnology and Biochemistry
- Computational Bioengineering and Biotechnology
- Bioinformatics and Biotechnology
- Biotechnology for Waste Management
- Nanobiotechnology
- Biotechnology and Molecular Biology
- Agricultural Biotechnology
- Agricultural Biotechnology in Developing Countries
- Agricultural Biotechnology Regulations, Rules and Perceptions
- Sustainability of Crop Production, Processing and Consumption
- Agricultural Biotechnology for Climate Change Mitigation and Adaptation
- Molecular Biotechnology
- Structural Molecular Biotechnology
- Applications of Molecular Biotechnology
- Plant Molecular Biology
- Protein Engineering and Enzyme Technology
- Environmental Biotechnology
- Bioremediation
- Detection and Monitoring of Pollutants
- Genetic Engineering Applications for Environmental Sustainability
- Green and Sustainable Manufacturing Technologies
- Environmental Biotechnology Applications and Implications
- Analysis and Control of Microbial Systems
- Microbial Ecology and Environmental Biotechnology
- Marine Biotechnology
- Marine Biotechnology and Microbiology
- Marine Biotechnology, Tools and Methods
- Marine Natural Products
- Marine Microbiology and Biodiversity
- Marine-Based Drug Discovery and Development
- Genomics and Proteomics of Marine Organisms
- Aquatic Microbial Ecology
- Marine Biological Resources
- Environment Applications of Marine Biotechnology
- Pharmaceutical Biotechnology
- Biopharmaceutical Drugs and Biotechnology Products
